Yalantis ISO certifications and what our clients obtain: Quality, security, and privacy standards for software development

> **The International Organization for Standardization (ISO)** is a global body that sets internationally recognized standards for products, services, and systems.

Becoming ISO-certified:

- demonstrates a company's adherence to rigorous standards for quality, security, data privacy, and other practices
- signals the company's dedication to continual improvement in these areas

Yalantis proudly holds globally recognized certifications in quality management, information security, and data privacy — **ISO 9001**, **ISO 27001**, and **ISO 27701**. These certifications validate our commitment to:

- operating as a client-centric business with transparent processes
- maintaining robust security throughout all development stages
- safeguarding personally identifiable information (PII)

Discover what each certification entails:

1. ISO 9001:2015 — Quality Management
2. ISO 27001:2013 — Information Security Management
3. ISO 27701:2019 — Privacy Information Management

Yalantis

ISO 9001: QUALITY MANAGEMENT SYSTEM

ISO 9001 offers a standard framework for a quality management system (QMS). Implementing ISO 9001 signifies a client-focused approach, mature quality management processes, and consistent project delivery meeting specifications with minimal defects.

ISO 9001 certification demonstrates that Yalantis:

- **continuously monitors, analyzes, and improves business processes** to meet industry standards and evolving client objectives

- **aligns the development lifecycle with client needs,** ensuring functionality meets requirements

- **updates knowledge bases consistently** for efficient knowledge transfer and reduced dependence on individual expertise

- **facilitates knowledge transfer** through documented procedures, developer handoff, and end-user training

- **identifies and manages potential risks** impacting product or service quality, such as budget overruns or skill gaps

- **optimizes resource management** involving personnel, equipment, and budget through practices like resource planning, capacity analysis, and budget tracking

- **conducts regular internal audits of QMS procedures** to ensure conformity and identify areas for improvement

Yalantis

ISO 27701: PRIVACY INFORMATION MANAGEMENT

The global standard for information security, ISO/IEC 27001 sets guidelines for a robust information security management system (ISMS). It shows the company's commitment to safeguarding intellectual property and preventing breaches.

Yalantis' ISO 27001 certification validates that the company:

- protects clients' intellectual property and confidential data

- maintains enterprise-grade information security controls for confidentiality, integrity, and system/data availability, such as access controls, encryption, and monitoring

- conducts risk assessments to identify emerging threats and vulnerabilities to information assets

- puts incident response plans in place to quickly recover from any potential breach

- manages third-party service providers and secures supplier relationships

- implements personnel security measures like security awareness training

- conducts internal ISMS audits at planned intervals to ensure conformity to requirements

Yalantis

ISO 27701: PRIVACY INFORMATION MANAGEMENT

ISO 27701 offers guidance on implementing a privacy information management system (PIMS) to responsibly manage personally identifiable information (PII). Its principles align with data protection principles in regulations like the GDPR.

ISO 27701 certification demonstrates that Yalantis:

- safeguards PII throughout its lifecycle
- supports global data privacy regulations
- provides a clear and accessible privacy policy
- assesses privacy risks from PII processing
- maintains and monitors PIMS effectiveness
- ensures legal compliance on data privacy
